Prediction of Creditworthiness

Using various financial attributes

PROBLEM STATEMENT: predict creditworthiness of individuals based on various financial attributes

DATASET USED: Statlog (German Credit Data)

https://archive.ics.uci.edu/dataset/144/statlog+german+credit+data

INTRODUCTION

Creditworthiness refers to an individual's ability to repay borrowed money. It is assessed based on various financial attributes and determines the likelihood that the individual will fulfill their debt obligations. Lenders use creditworthiness to decide whether to approve a loan application and what terms to offer.
